

Lesson: MAKE SOME CHRISTMAS BUNTING

In this lesson, we will create some Christmas bunting. You can decorate your bunting with paint, coloured pencils, crayons, stickers, ribbon, tape or any other art and craft supplies you may have. Bunting is often placed above doorways and along walls as decorations at special times such as Christmas. So, let's gather our supplies and start creating!

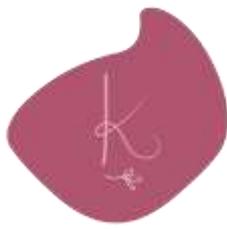

Step 1	Gather your supplies. You can choose to use paint, pencils, crayons, stickers, ribbon, craft tape or any other items you may have, for this artwork. To create our bunting, we will use the template included at the end of this lesson.	
Step 2	<p>Print the bunting template (you can print multiple copies, depending on how long you would like to make your bunting), and carefully cut around the outside line of each piece.</p> <p>Optional: You can use coloured paper in your printer (e.g. red, white and green) if you like, for a Christmas theme.</p> <p>Fold the top section/flap of the bunting, so that it can hang on some string.</p>	

Step 3	<p>Plan your bunting design. Will it have stripes, spots, presents, stars, Christmas trees, cats in party hats, or maybe a special Christmas message? Use your imagination and be creative in your design. Do a Google search to find inspiration. If you need to practise your drawings/design, practise on some spare paper. Once you are happy, you can start on your bunting.</p>	 <p>Created by my 5-year-old!</p>
Step 4	<p>Once your design is complete, hang the folded end/flap of the bunting pieces over a long piece of string. Then use some tape, glue or blu-tack to stick each flap down. Cut the string to size (e.g. long enough to hang across a door, window, or wherever you would like to hang your bunting).</p>	
Step 5	<p>Ask an adult to help you hang your bunting. You might also like to use tinsel or other Christmas decorations to add to the overall effect.</p>	

We would love to see some of your bunting creations! Please send a photo of your bunting designs, along with your media permission form to kimbakerdesign@gmail.com

Please feel free to email me if you have any questions.
